

# AP Calculus BC Assignment 2018

WELCOME TO AP CALCULUS BC! This year, the summer assignment for this class will be done on Khan Academy. The assignment will consist of watching videos and answering questions about limits and derivatives. Please do not wait until the last minute to complete this assignment!

1. Please join the AP Calculus BC Google Classroom using the code: **8zwpn**
2. If you do not have a Khan Academy Account, please create one by going to <https://www.khanacademy.org>
3. Once you have created an account or logged into your account, go to <https://www.khanacademy.org/coaches> (or the "Coaches" tab in your profile).
4. In the "Join a class field, enter the class code: **6QVY76AV**.
5. Once you are "registered" in the Khan Academy class, the assignments will be posted for you to view within 24 hours. You must register no later than June 27 (Final Exam Make-Up Day) so I can make sure that everyone is all set before you leave for the summer!

Please remember that a TI-83 or TI-84 graphing calculator is required. I recommend the TI-84 Plus CE that is always on sale at Target and Walmart over the summer, but you are not required to get this model. If you choose to buy a Casio graphing calculator, you will be responsible for figuring out how it works.

If you have any questions, please feel free to contact me over the summer. My e-mail address is [jbrogan@fallriverschools.org](mailto:jbrogan@fallriverschools.org). Enjoy your summer! See you at the end of August!
