

# Exploring the Landscape of Fractions, Decimals, and Percent

## Field Trips and Fundraisers

### **SIGN UPS ARE ON X2 - MAT 2012**

The Fall River Public Schools' Office of Instruction announces a professional development opportunity for mathematics teachers in Grades 4 and 5. Using Field Trips and Fundraisers as a context, participants will deepen their understanding of rational number. Participants will analyze student work, watch children at work, and analyze teacher moves throughout the math workshop. Participants will also explore the importance of the number line as a measurement model for fractions by connecting investigations in Field Trips and Fundraisers to MCAS released items.

Sessions will take place on the following Wednesday evenings from 4:15-5:45pm in Kuss Middle School's Community Room:

**February 8**

**February 15**

**February 29**

**March 14**

**March 28**

Participants will be compensated at the stipend rate for their time and will be awarded PDPs at the completion of the course.
